

AirPlus

On the red carpet ✨ with AirPlus

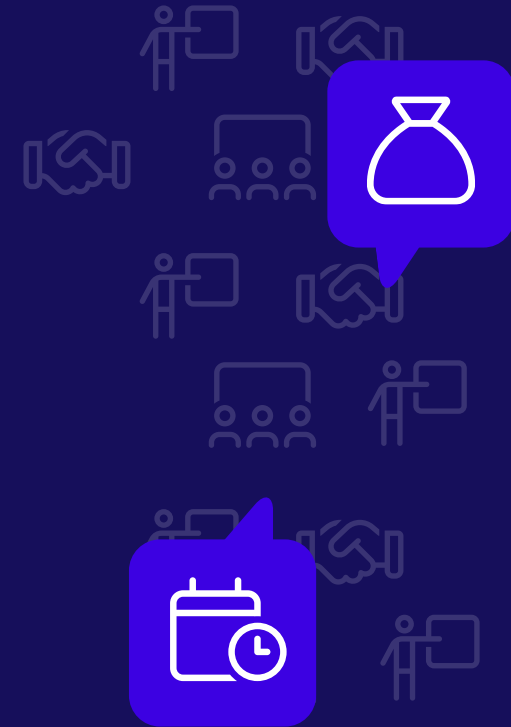

How an international fashion brand
handled payments for the
Oscar night and Fashion week in
Los Angeles.

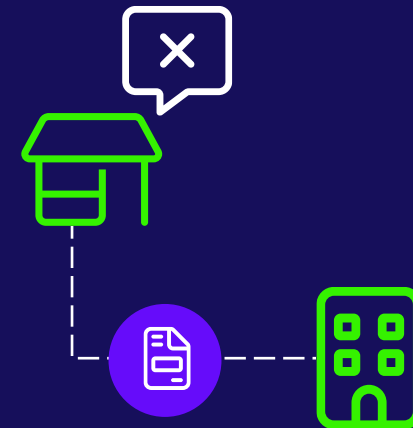

From the risk of
losing out on the
night of the Oscars...

The customer must make a **large immediate payment** to the venue for the **arrangement of employee travel** to the Fashion Week in Los Angeles, followed by a trip to Hollywood for Oscar night.

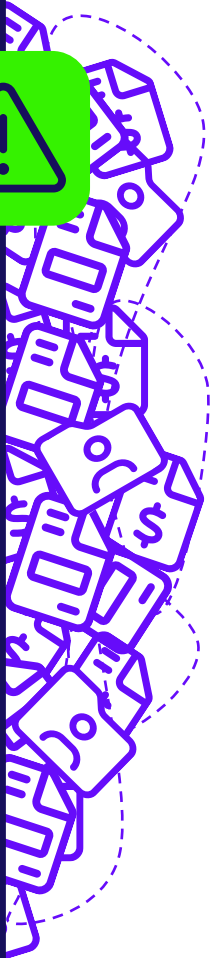

The **agency** responsible for organizing the event **can't advance such a large payment**: the company must make the payment directly.

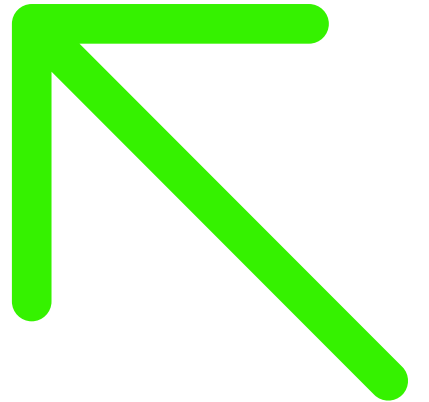

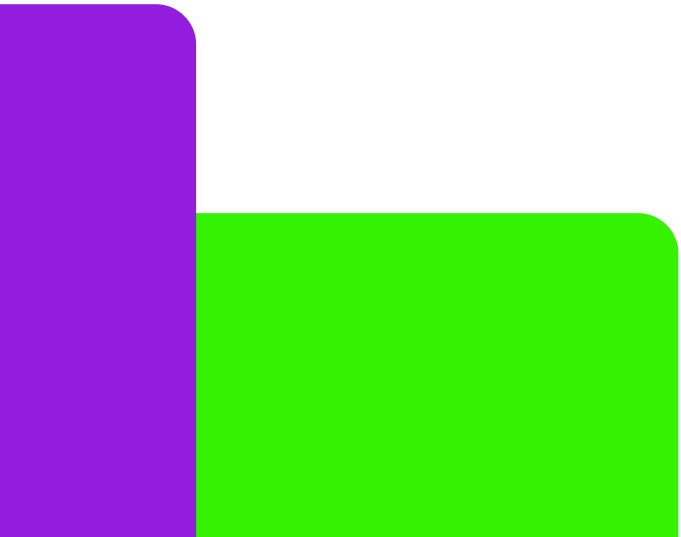

The available credit left to spend
for the period **isn't**
sufficient for the payment of the
requested amount.

The event planner **can't anticipate all on-site expenses** such as last-minute cleaning, make-up, or flowers. This requires a **lot of time on return to fill out the expense report** and makes it difficult to **report on the total costs of the event.**

... to winning
the award!

Spotlight on the AirPlus solution

A suite of **centralized payment products** for pre-event and on-site expenses.

Thanks to our **customizable payment products and fast-responding customer support**, our client was equipped with a payment solution for **any type of payment before shining on the catwalk.**

... but what
are the “on
stage” payment
solutions?

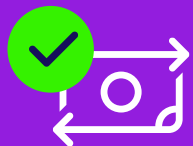

Thanks to the Company Account used by the agency, all flights could be booked.

AirPlus Virtual Cards were used to book and pay in advance for the Fashion Week event locations.

Through AirPlus solutions, suppliers were paid immediately while the client was only charged at the end of the AirPlus statement billing cycle.

For last-minute on-site purchases such as flowers, additional catering, cleaning, etc., the event planner was equipped with an AirPlus Office Card.

The Office Card guarantees centralized and secure payments with all vendors that accept Mastercard®.

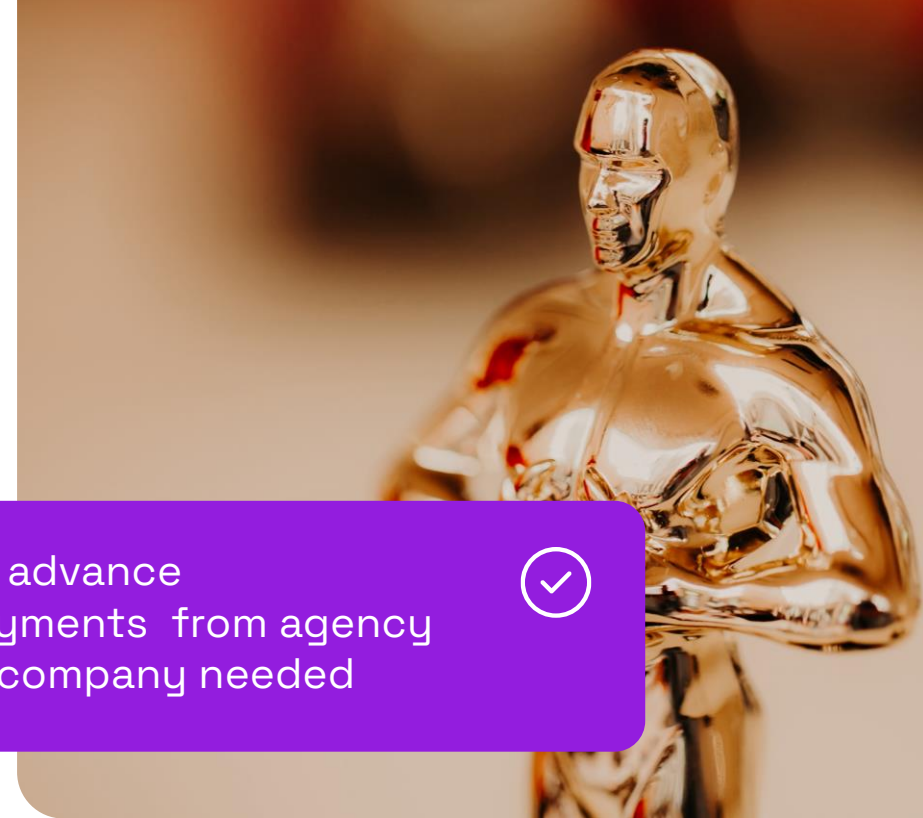

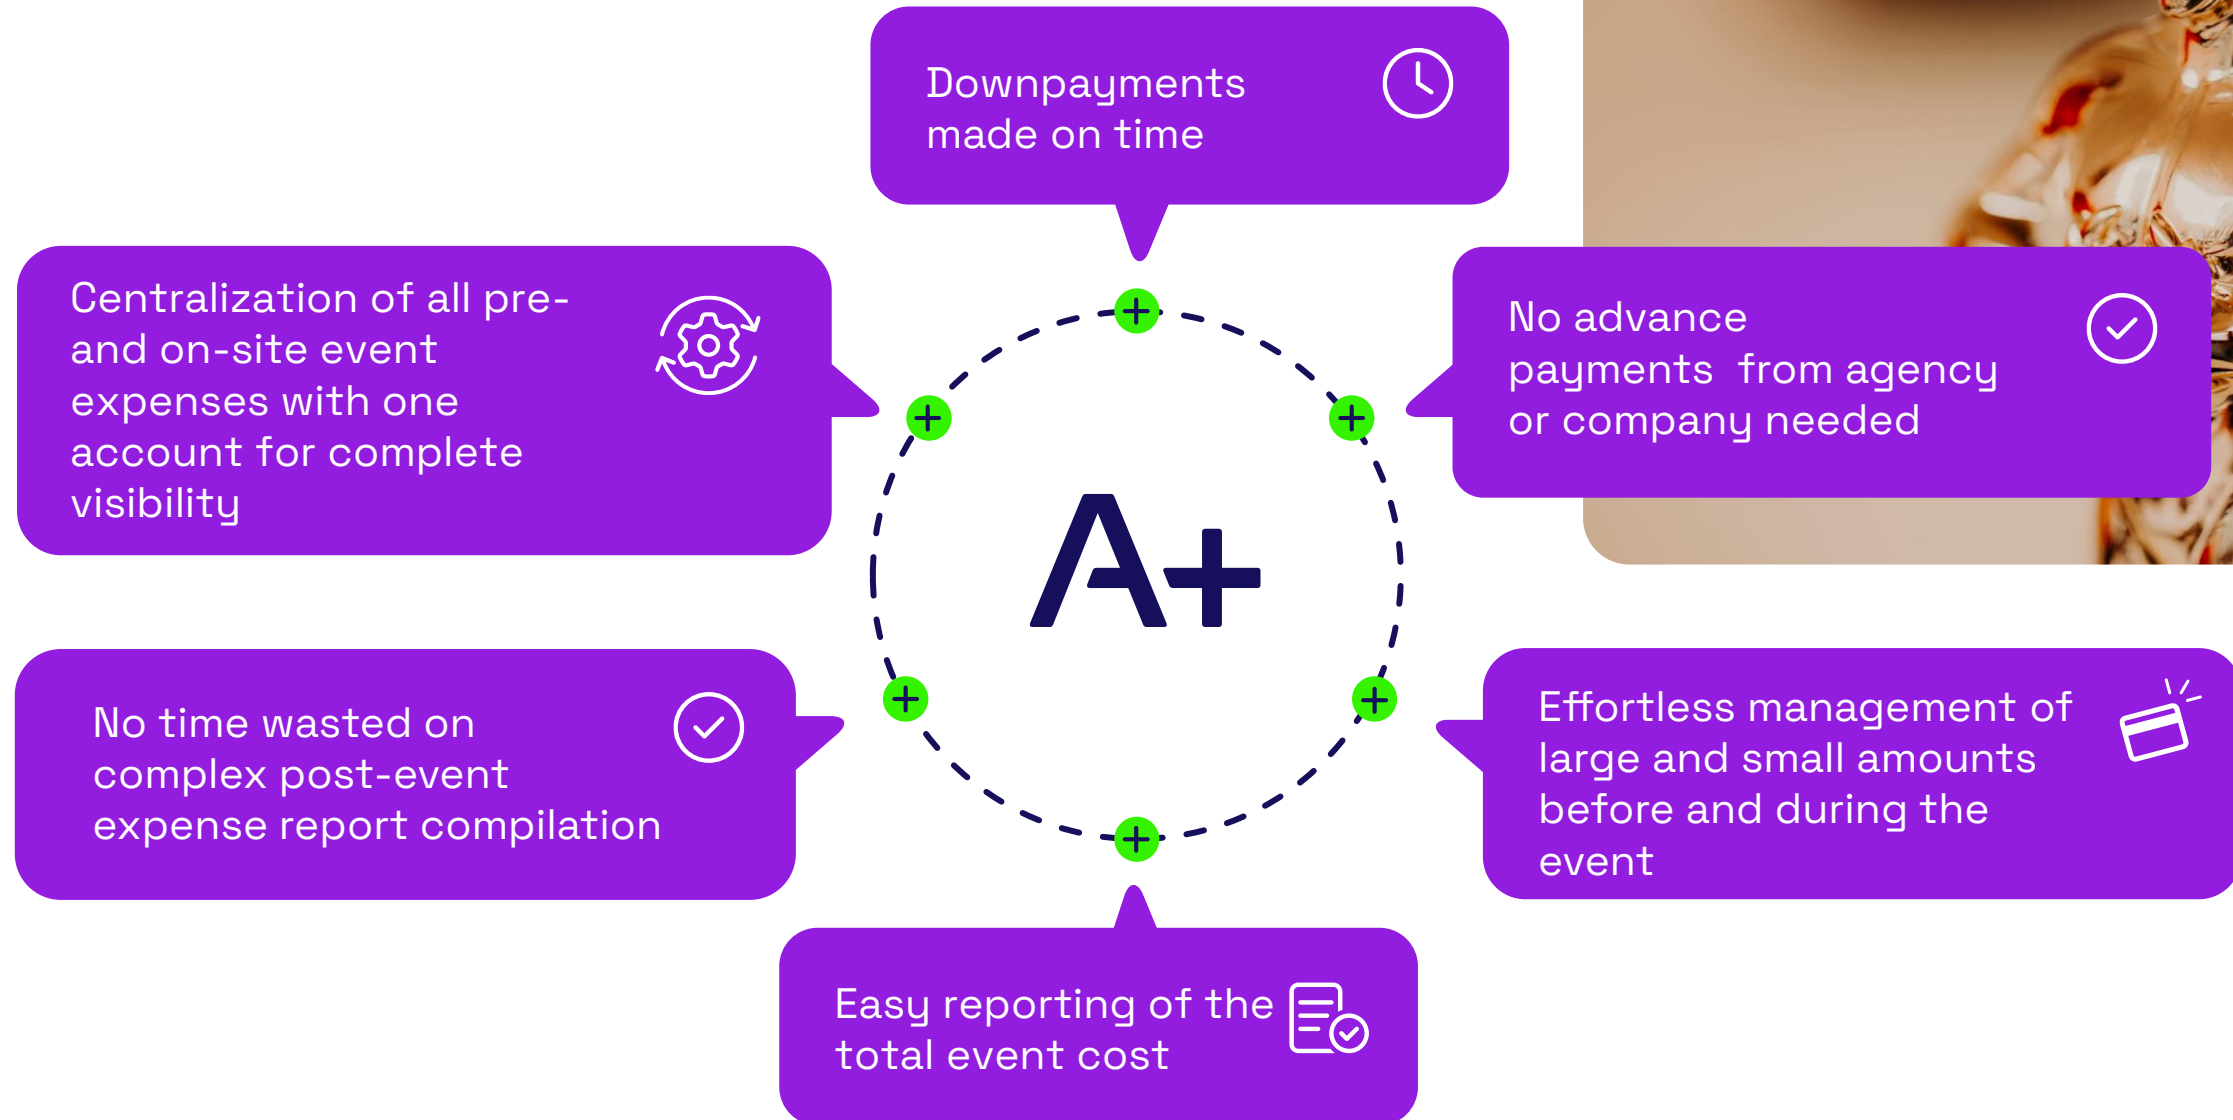

The Office Card can simply be used from the mobile wallet.

Each transaction with the various centralized AirPlus payment solutions carries important billing details and expense data, bringing effortless reconciliation and detailed reporting while seamlessly integrated into your ERP system.
